# Captin

Always prepared and standing at attention, Captin the bin is ready to keep busy and bustling environments clean and tidy. Captin is the newest—and quite possibly the greatest—addition to our waste bin collection.

Designed to meet the needs of larger office complexes and public spaces like hotels, malls, airports, and schools. Its playful yet unassuming design invites usage without overpowering its surroundings. Whether placed individually or grouped together, Captin seamlessly integrates as both a functional necessity and a design statement.

Captin is equipped with a convenient hatch for easy emptying and handling, eliminating the need for heavy lifting altogether and optimizing ergonomics. It comes with a standard holder for common waste bags, secured in place with magnets, or alternatively, the environmentally friendly Longopac system is available as an accessory. This innovative system utilizes cassettes instead of bags and is made from at least 50% recycled plastic or bioplastic, resulting in an 80% reduction in carbon dioxide emissions and a 70% reduction in plastic consumption, according to the manufacturer. The benefits are numerous, ranging from hygienic and practical to environmental.

---

<b>Design</b>	Addi Design Studio
<b>Environment</b>	Indoor
<b>Material</b>	The bin consists of 8-30% recycled metal and is powder coated. The powder coating provides both environmental and quality benefits as no solvents need to be added and the amount of waste is minimum.
<b>Paint/Lacquer</b>	Powder coated metal.
<b>Country of origin</b>	Sweden
<b>Features</b>	It comes with a standard holder for common waste bags, secured in place with magnets, or alternatively, the environmentally friendly Longopac system is available as an accessory.
<b>Preassembled</b>	Fully assembled.
<b>Repairability</b>	Door, “cap” and bagholder can be replaced.
