Hex key

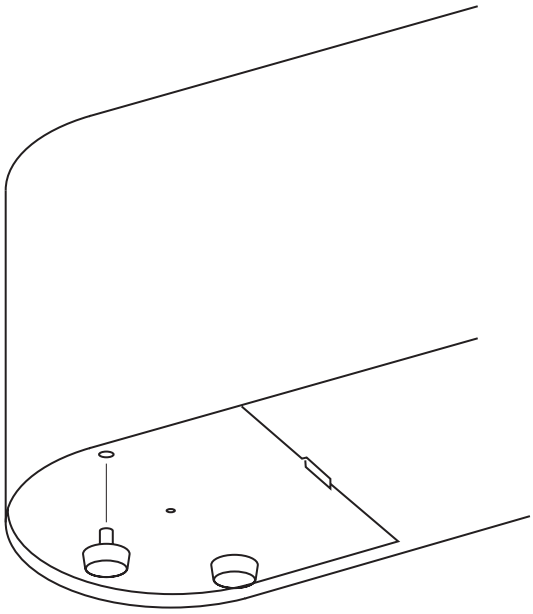
ASSEMBLE PLANT HERE SINGLE

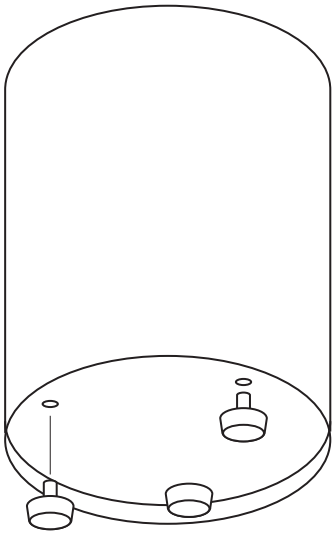
The construction is easy to assemble with few parts.

1. ATTACH THE FEET

Start by mount the feet of the oval and round planter.
No tools needed, just use your hand to press them into place.

Note that this step might not be necissary for all parts if configurations are built. See next page.





2. CONFIGURATIONS

Part from using Plant Here as a single you can combine two or three to create larger installations.

⚠ Do not stack more modules than what is showed in the examples since this might increse the risk of tipping.

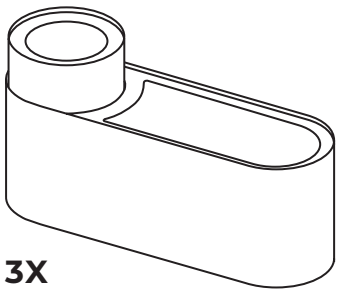
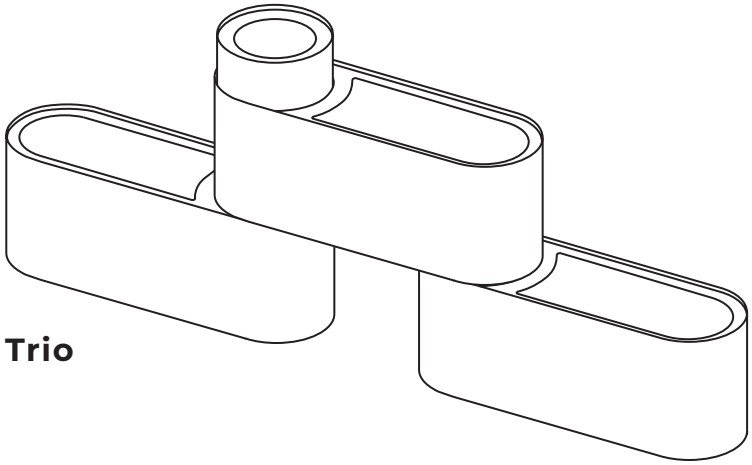
Duo



3X

=

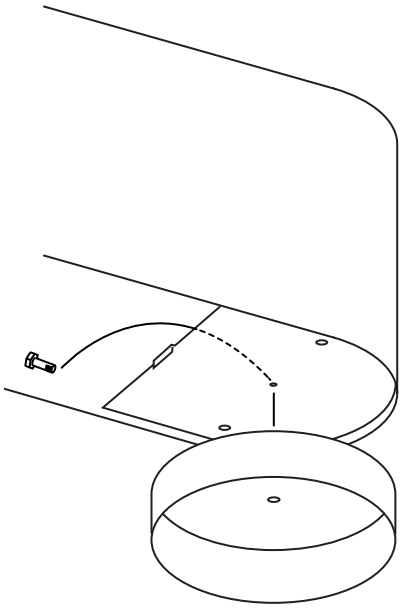


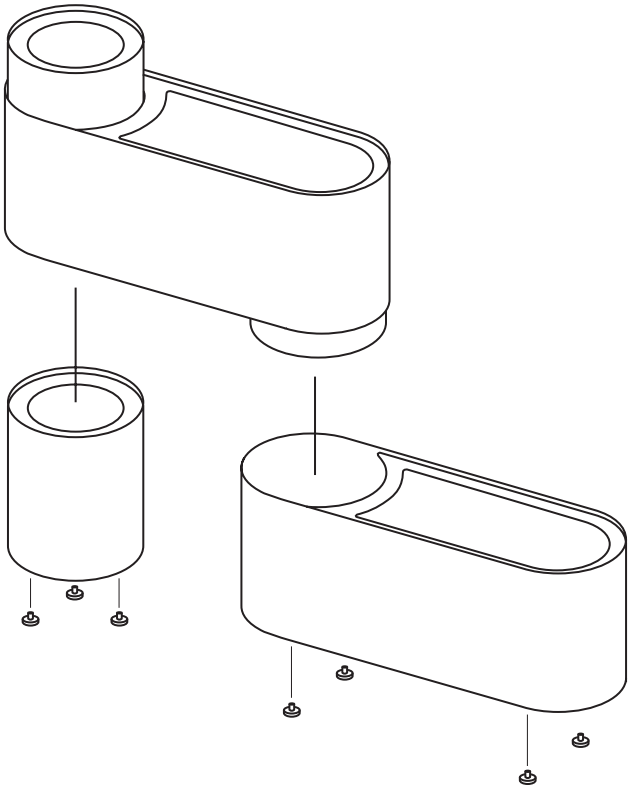
Trio

3. PLANT HERE DUO

Mount the feet of the oval planter and round planter that is supposed to stand on the ground. Do not mount the feet of the planter going on the top.
Istead mount the round connector on the side going on top of the other oval planter. Secure the connector with the hex head bolt from the inside of the bottom shelf.

Next, gently place the top planter on the oval and round planter, making sure it rest firmly on them both.

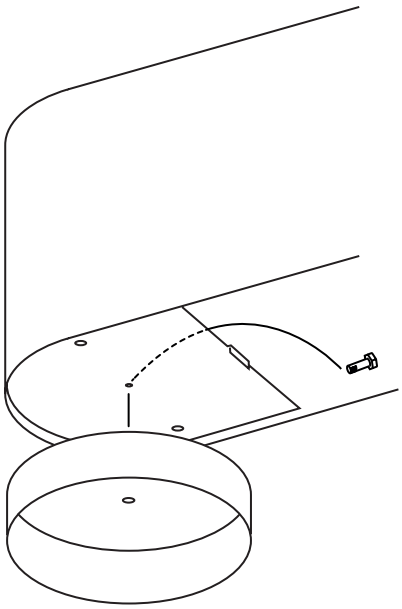


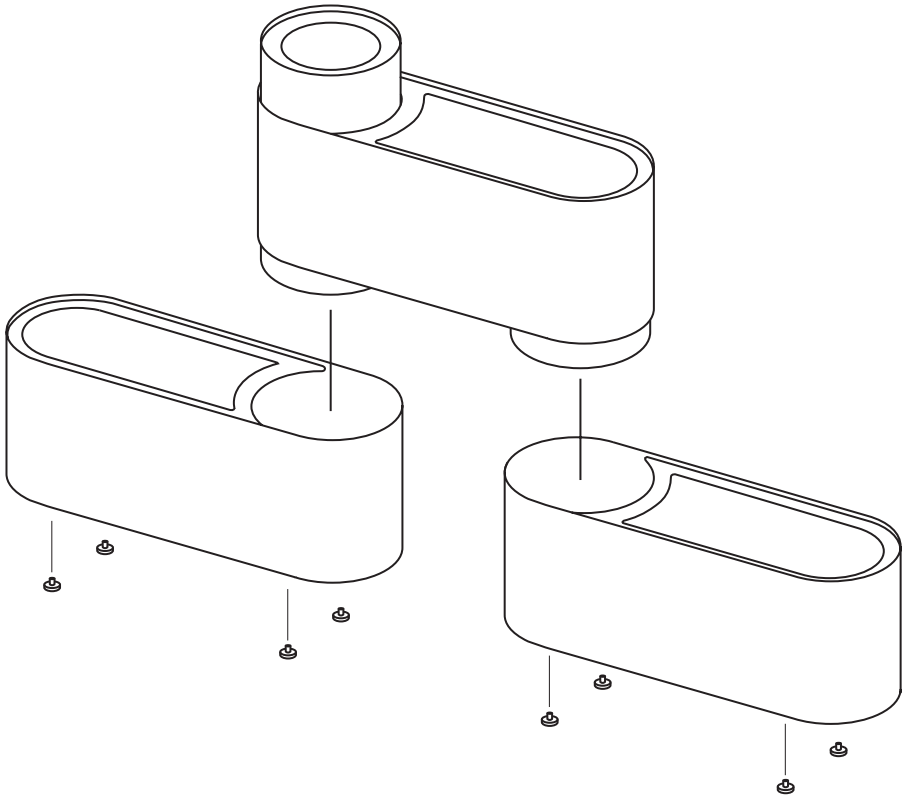


4. PLANT HERE TRIO

Mount the feet of the oval planters that is supposed to stand on the ground. Do not mount the feet of the planter going on the top.
Istead mount the round connector on both sides. Secure the connector with the hex head bolt from the inside of the bottom shelf.

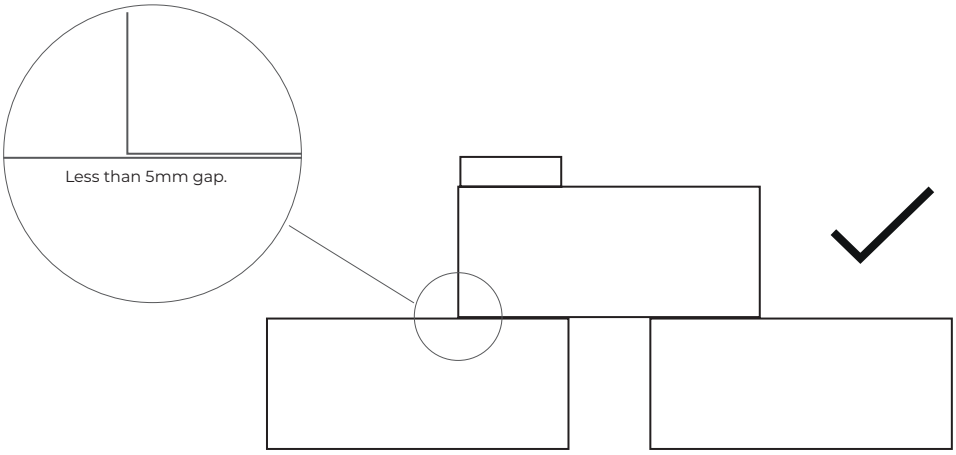
Next, gently place the top planter on the oval planters,
making sure it rest firmly on them both.

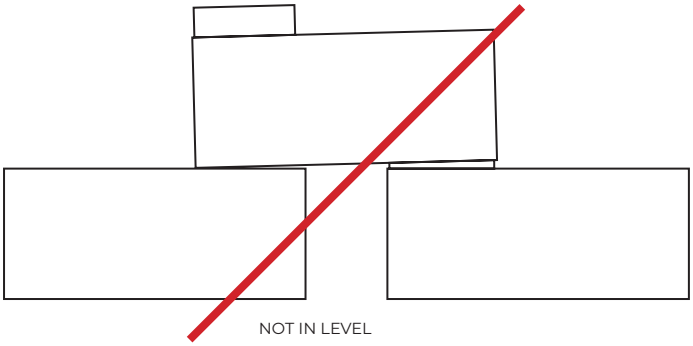




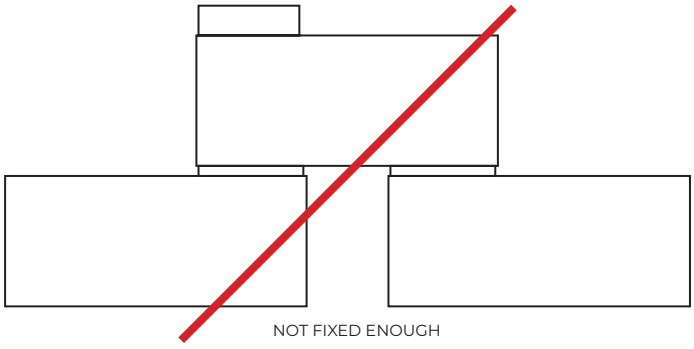
5. PLACING THE MODULES

Notice that modules must be palced correctly to make sure the top module wont tipp. Therefor see that there the top module is in level and that it rest firmly on the bottom modules. This means that it's not more that 5mm of distance wherre the modules meet.





NOT IN LEVEL



NOT FIXED ENOUGH
